

Dibao Moisture-Proof Toroidal Transformer

Our moisture-proof toroidal transformer is specially designing for using in the moisture environment. The transformer pots with a potting technique through special vacuum-gauge pressure, baking and solidifying to be molded in a high temperature.

Meanwhile, we wipe the especial and safe material, which is dust-proof、moisture-proof. Contrasting with traditional one, it can be even moisture-proof、dust-proof、acid-proof、alkali-proof, and the exterior can be even beautiful.

This is our [Moisure-Proof Toroidal Transformer](#) ,if you have some question about it ,you can contact with us at any time. Meanwhile we can design and product according to your requirement.
