

Current Transformer - Single Phase

Characters:1)Potted with compound and better isolated, better resist-rush;

2)High temperature resistant, corrosion-proof;

3)Small volume, beautiful exterior;

4)Wide range in linearity, better consistency.

Current:50mA ~ 500A.

Usage: Medical treatment, apparatus instrument, communications,etc.

This is our [Current Transformer - Single Phase](#) ,if you have some question about it ,you can contact with us at any time. Meanwhile we can design and product according to your requirement .
