

## 12 Volt Transformer-Three phase R core Power

Dibao R Core Transformer, we have single phase and three phase transformer, product specifications: from 10W to 1000W power. It has unique feature: Low cubage, lightweight, high efficiency, low leakage, low quantity of heat, low excitation current. Characteristic: without fracture, with round section area, horizontal, thinness, adapt to high density's installation, compare to E&I transformer: a. 30% smaller and 40% lighter; b. Low magnetic loss upward of 90%; c. Temperature raise lower under 50%; d. Winding is round, medial winding length reduce 6% ~10%, low cuprum loss.

We have many excellent staff and have advanced produce facilities, and manage on the basis of the request of ISO9002 strictly.

Guarantee products quality, welcome to contact us!

**This is our 12 Volt Transformer-Three phase R core Power, if you have some question about it ,you can contact with us at any time. Meanwhile we can design and product according to your requirement.**

**Attention: Because of the error of input as well as vision, all Dibao transformer pictures' real situation based on real object or sample.**
