

Sign Transformer--Dual C-core Output Power

Dibao Dual C-core output transformer is winding with Dual C-core, not traditional EI model. Compared with the Japanese Cut-core, it has more strongly magnetic power than EI-core, the character with no over load distortion is better, the reaction of low frequency is stronger and deeper, so Single Terminal 300B machine is exploited the Dual C-core output transformer.

Attention: Because of the error of input as well as vision, all Dibao transformer pictures' real situation based on real object or sample.

This is our [Sign Transformer--Dual C-core Output Power](#),if you have some question about it ,you can contact with us at any time. Meanwhile we can design and product according to your requirement.
