

## **Sign Transformer--25W Output Power**

**Our factory produces a new product called output transformer, which uses the newest idea to design. Meanwhile, we use the company called “Japan Xin Ri Tie”, which produces the special steel with old-pricking, no-tropism, high silicon and video-frequency. The string package is winded with high-quality, no-oxygen, copper enameled wire. Every stratum uses pure wood pulp and insulated paper to insulate, make in extractive intention. Besides, we use winded to advanced potting craft to make the transformer with good insulatibity and moisture resistance, it has a beautiful exterior, and the product is distributed all over the world.**

**This is our Sign Transformer--25W Output Power,if you have some question about it ,you can contact with us at any time. Meanwhile we can design and product according to your requirement.**
